

LexisNexis® eCrash

Simplifying the management and distribution of accident/crash reports for Law Enforcement

For law enforcement agencies, fulfilling requests for accident/crash reports can be time-consuming and costly. Fueling the complexity and high cost is the reality of most agencies' report handling process: manual processing, outdated record storage and retrieval practices, inefficient delivery of reports to state registrars, and legacy technology that hinders efficiency.

The LexisNexis® eCrash solution is helping law enforcement agencies address the challenges to cut cost, increase efficiency and enhance interactions with citizens.

LexisNexis® eCrash

LexisNexis® eCrash is an online accident report management solution that helps agencies automate their vehicle accident reporting process online. The service is provided at no charge to agencies.

By using the LexisNexis® eCrash solution, your law enforcement agency gains cost-effective management and distribution of accident/crash reports that will:

- Simplify report data entry, storage, access and distribution.
- Eliminate manual handling, save time, reduce clerk costs and increase administrative efficiency.
- Sustain or grow report revenue by collecting report fees on the agency's behalf. Your agency continues to receive fees generated from each report at the rates determined by the agency.
- Improve service to the public, as citizens and insurance companies can purchase accident reports on-demand online, 24/7.
- Lower risk of technology change, thanks to regular updates and maintenance of the solution's technology infrastructure.
- Free up agency staff to handle more important duties. The solution dramatically decreases walk-in and mail report requests, and eliminates the agency's need to input crash data.
- Improve agency's investigative strength due to easy access to their accident/crash reports and those of other participating agencies.

Save Time and Money

Features of LexisNexis® eCrash cover the entire accident/crash report handling process:

Capture Data – Captures all data elements from agency accident reports via several non-intrusive data collection options, and stores the data in a secure database on the agencies' behalf at no expense to the agency. LexisNexis® eCrash will provide agencies the equipment required to digitize accident reports if necessary.

Inform Parties – Supplies officers with Exchange of Information Cards to give to involved parties at accident scenes that direct requests for accident/crash reports to the secure LexisNexis website.

Automated Reporting – Enables electronic delivery of accident reports to state registrars as well as management reports that provide transactional details.

Search Reports – Law enforcement agencies have free access to their accident/crash reports as well as reports from other contributing agencies.

Support Public Safety – Serves as a traffic and safety resource, helping to identify unsafe roads, dangerous intersections, and areas in need of better traffic signals.

Share Vehicle History – Offers free access to a vehicle history report database with vital information investigators need to identify and reduce vehicle theft and fraud.

Administrative Account – Provides agencies the ability to manage users, view downloads, set up alerts, edit user profiles and preferences, and add new users.

The image displays two screenshots of the LexisNexis eCrash web application. The top screenshot shows the 'Purchased Reports' section, which includes a table of accident reports with columns for 'Report Date', 'Date of Loss', 'Accident Location & Jurisdiction', and 'Reference No.'. The bottom screenshot shows the 'Search Accident Reports' form, which includes fields for 'Jurisdiction', 'Name' (First Name and Last Name), 'Date of Loss', 'Accident Location' (Street and Cross-Street), and 'Report Number'. There are also 'Alerts' and 'Announcements' sections visible on the right side of the interface.
